AMENDMENTS TO THE CLAIMS

1. (Currently amended) An apparatus for mixing liquid decontaminants and dispensing a foam-based or liquid-based decontaminant, said apparatus comprising:

a plurality of tanks capable of containing liquids;

a pump assembly having

a plurality of pumps, wherein each pump is in communication with a respective tank, and each pump has a respective drive assembly;

a plurality of couplings positioned between said plurality of said said pumps, said plurality of couplings connecting each of said drive assemblies of said plurality of pumps;

a motor secured to an end of one of said pumps, said motor connected to more than one of said drive assemblies such that said motor engages said connected drive assembly and further drives any other connected drive assemblies at the same time; and

a manifold in communication with said plurality of pumps and said plurality of tanks, said manifold for ~~capable of~~ mixing liquids from said plurality of tanks;

wherein said plurality of pumps are capable of drawing liquids from said plurality of tanks in defined ratios through said pumps to said manifold for mixing and dispensing.
